

Door Entry Systems

What should I do if I have a new smartphone, and the Busch-Watchdog PRO KNX isn't connected with another smart device?

You can create a backup of your configuration in the SmartConnect app, which will be stored in the MyBuilding Portal. To do this, you must have a MyBuilding Portal account. After installing the SmartConnect App on your new smartphone, you can download the backup from the MyBuildings Portal and restore it to your device.
