DALI

How many DALI participants / groups can I control via KNX with the DALI-Gateways Basic DG/S x.64.1.1?

The control of the luminaires via KNX is variable per DALI output:

- Broadcast (all lights together)
- 16 lighting groups
- 64 Individual lights
- 16 scenes
- 64 single battery emergency lights

DG/S 1.64.1.1 = 1 DALI output

- 1 x 64 DALI participants
- 1 x 16 DALI groups
- 1 x 64 emergency light converter (single battery emergency light)
- 1 x 16 Scenes

DG/S 2.64.1.1 = 2 DALI outputs

- 2 x 64 DALI participants
- 2 x 16 DALI groups
- 2 x 64 emergency light converter (single battery emergency light)
- 2 x 16 Scenes

The DALI-Gateways differ in the number of DALI outputs. These are equivalent and have the same technical features and functions.
