

DALI

Can I change the color temperature as well using a 1-byte scene recall with the DG/S x.64.5.1?

Yes, the color temperature can be changed with a scene recall.

The screenshot shows a configuration interface for DALI. On the left is a sidebar with a tree view containing 'General', 'DALI output A', 'A DALI configuration', '+ A Output', '+ A Group x/ballast x template', '+ A Groups', '+ A Ballasts', and '- A Scenes'. Under 'A Scenes', 'Scene 1' is selected and highlighted in yellow. The main area displays configuration options for 'Scene 1':

- Transition time for scene: 2.0 s
- Overwrite saved scene val. on download: No Yes
- Group 1 is member of the scene: No Yes
- Change brightness: No Yes
- Brightness value: 100% (255)
- Change Colour temperature: No Yes
- Colour temperature: 3000 K
- Group 2 is member of the scene: No Yes

The 'Change Colour temperature' option and its corresponding 'Colour temperature' input field are highlighted with a red rectangular box.

Unique solution ID: #1715
