

DALI

DG/S x.64.x.1: Is it possible to dimm several DALI ballasts in parallel with the new DALI Basic and DALI Premium gateways?

Yes it is. The best way to do this is to control the ballasts via groups.

Dimming several individual ballasts in parallel can lead to different brightness values in the DALI system. Incorrect status responses can also be a result of this.

Hence the clear recommendation:

Parallel dimming of several DALI participants, always via groups!
