

Commissioning and Configuration

How to create lighting or shutter groups in free@home?

[free@home](#) allows you to control lights or shutters individually or in groups.

Individually means a single switch is connected to a light or a shutter.

In groups means several lights or shutters are connected to a single switch. Example: all lighting in the kitchen are connected to one switch.

The following video will show you:

- what kind of settings are available for lighting or shutters
- Where can you edit settings for lighting and shutters
- How to connect a light or shutter group, or a scene to one switch
