

# **Automation, Logic and Time Control**

## **How long does it take to download the application of the ABA/S 1.2.1 via KNX/USB and would you recommend it?**

In principle, all projects can be programmed via KNX/USB. However, please note that as bigger the project is the longer it takes to download via USB. It takes up to 60 minutes with a fully developed project (5.000 elements).

That is the reason why we recommend to download the application over IP.

Unique solution ID: #1274
