

Heating, Ventilation and Air Conditioning

FCC/S 1.x.x.1: What should be considered if weighting of internal and external measurement is set to 0%?

If all measurements are set to 0% only one value is used for calculation. The following examples shows which one:

Internal measurement weighting	<input type="text" value="0"/> counts 100%	▲▼	%
Weighting of external measurement 1	<input type="text" value="0"/>	▲▼	%
Weighting of external measurement 2	<input type="text" value="0"/>	▲▼	%
Weighting of external measurement 1	<input type="text" value="0"/> counts 100%	▲▼	%
Weighting of external measurement 2	<input type="text" value="0"/>	▲▼	%
