Heating, Ventilation and Air Conditioning

Is it possible to control heating and cooling application within one channel of the HCC/S 2.x.x.1?

No, because there is only one controller per channel. To switch between heating and cooling the associated KNX communication object has to be used.

| ⬛⇄ 65 | Channel A - Controller | Heating/Cooling changeover | 1 bit | C | - | W | T | U | cooling/heating |
