

# **System, Infrastructure and Interfacing**

## **How many devices can be included in one free@home-system?**

Each free@home device, with the exception of the power supply, counts as a participant. With the wired solution or wireless solution, up to 64 participants can be installed in one system. However, if you combine the wired and wireless solution, 64 wired + 64 wireless participants (128) can be installed in one system.

Unique solution ID: #1029
