

System, Infrastructure and Interfacing

How many users can operate the free@home system at the same time?

There is no limit on how many users can operate the free@home system at the same time. However, it is recommended to operate the system with only 4 users at the same time.

The reason for the limit is that, depending on the changes made, several users operating at the same time can lead to losses in performance (the changes take longer to implement).
